

Linguistics C111/211: Intonation Spring 2024

Class: Mondays & Wednesdays 2pm-3:50pm, in Royce 160

Instructor: Sun-Ah Jun (jun@humnet.ucla.edu; Ling Dept.: 310-825-0634)
Office hours: Monday 1:00-1:30pm, Wednesday 4-5:30pm (Campbell 2101J),
and by appointment (<https://ucla.zoom.us/j/7138245501>).

Section: Thursday 2-3am in Public Affairs 2238
TA: John McGayhay (jmcgahay@g.ucla.edu)
Office hours: Thursday 3-4pm in Rolfe 1110

Course description: In this class, we will learn the Autosegmental-metrical (AM) model of intonational phonology and the ToBI (Tones and Break Indices) transcription system. For 7 weeks, the course will concentrate on transcribing English intonation based on MAE_ToBI (Mainstream American English ToBI), a standard system for transcribing English intonation contours and prosodic structure. The course will also cover topics on intonational form and meaning, including focus, and how intonation affects production/perception of speech and sentence processing. For the rest 3 weeks, intonational phonology of other languages, especially Japanese, Korean, and French, and a model of prosodic typology will be covered.

Most classes will combine lecture and transcription exercises. *Praat*, speech analysis program, will be used in class for analyzing intonation. Speech files and course materials will be accessible in the Bruin Learn course website (<https://bruinlearn.ucla.edu/courses/185267>).

Prerequisites: Ling 20, 102 or 103, Ling 120A or 120B. Strongly recommended: LingC104/204A

Textbook: - *Intonational Phonology*, 2nd edition, by Robert Ladd (2008), Cambridge Univ. Press
: required for graduate students, but optional for undergraduate students
- Speech files and readings in the Bruin Learn class website

*This course is part of the UCLA **Inclusive Access program**. The course materials are being automatically provided to you, digitally, through BruinLearn by the first day of class or upon enrollment. The materials are being provided at a reduced and competitive price. You will receive e-mail from the UCLA Store (UCLA Store <no-reply>@verbasoftware.com) with program details and cost sent directly to your email address on file with the UCLA Registrar. Check your spam folder if not received. Everyone enrolled in this course is automatically a participant to start and will have access to the materials through 2nd week of class. Those remaining in the program after 2nd week will be billed for the materials directly to their BruinBill account and will continue to have access to the course materials. If you do not wish to participate in Inclusive Access, you must opt-out by the Friday of 2nd week deadline or you will be billed. Those who opt-out will lose access to the digital materials starting week 3. If you have questions, contact inclusiveaccess@asucla.ucla.edu.*

- On Reserve at College Library (Powell). All items can also be viewed online.
 - *Intonational Phonology* (2008) ed. by Robert D. Ladd. Cambridge U. Press
 - *Prosodic Typology: The Phonology of Intonation and Phrasing* (2005), ed. by Sun-Ah Jun. Oxford University Press
 - *Prosodic Typology II: The Phonology of Intonation and Phrasing* (2014), ed. by Sun-Ah Jun. Oxford University Press.

Accessing E-resources: these Items can be accessed online directly through the "Course Reading List" by clicking on the "View Online" link next to the item's title. Please note that you need to either be on campus or actively connected to the campus VPN before being able to access the Library's online resources. Instructions on how to connect to the UCLA campus VPN can be found [here](#).

Accessing Print resources: You can access print reserve items by going to the Powell circulation desk on the 2nd floor and specifying the title, author's name, and edition to the desk staff. The reserve items are available for a checkout period of **two hours** at a time.

Course requirements and rules:

- Five homework assignments, mostly based on lab exercises. You can discuss the homework questions with classmates but the final answer should be given based on your own judgement. Typically, each assignment (pdf) and accompanying sound files (wav) will be available at the course website on Wednesday (except for Assignment V) and due a week later at the beginning of class. Late homework will get half credit at most, but no credit if it's later than class discussion.
- Midterm exam (15%)
- 10-minute individual production exam during the finals week (10%)
- Final exam (25%) -- for undergraduates only: cumulative.
- No makeup exam will be given except in dire, documented medical or family emergencies. If it's possible, please email me *before* the test!
- Individual term project (40%) for graduate students. Graduate students are urged to discuss their project topics with the instructor by the end of week 7.
- DUE DATES MAY CHANGE -- it is your responsibility to keep informed about what is due when.

Grading types	% for Undergrads	% for Graduates
Five Homework	50% (10% each)	35% (7% each)
Midterm exam	15%	15%
Final exam	25%	NA
Production exam	10%	10%
Term Project	NA	40%
Total	100%	100%

Possible project topics (for Ling211 students):

- a. Develop a phonological model of intonation of any language whose analysis is not done in the AM framework of intonational phonology.

(For information on languages whose intonation has been analyzed in the AM framework or existing ToBI systems, visit ToBI homepage, archived in: <https://web.archive.org/web/20130218081131/http://www.ling.ohio-state.edu/~tobi/> and check out the chapters in two books, *Prosodic Typology I* (2005) and *Prosodic Typology II* (2014), edited by Sun-Ah Jun, Oxford University Press, and also Romance language ToBIs in Frota & Prieto (2015), and Spanish ToBIs in Prieto & Roseano (2010), and various dissertations.)

- b. Develop a phonological model of intonation of a dialect, regional or social or ethnic, etc. of any language whose standard dialect has already been described in intonational phonology.
- c. Describe and analyze intonation of speech which triggers special discourse meaning or function in conversational speech or speech of special contexts such as political speech, announcement, advertisement, answering machine speech, or sorority/fraternity, or any social group speech.
- d. Any work on linguistics involving analysis of intonation, i.e., interface between prosody and any subarea of linguistics. Ex. the role of intonation in semantics/pragmatics (the interpretation of focus, topic, or scope of quantifier, etc.) and sentence processing; Relation between intonational phrasing and syntactic structure; Intonation in children's speech; Motherese; Second language learners' speech; intonation of people with various speech and language disorders, etc.

Minimum Data: For 'a' and part of 'c' and 'd' type topics, a short dialogue (about 20 lines) produced by two speakers from the same group (Read Jun & Fletcher (2014) for tips on data collection and analysis.). For 'b' and part of 'c' and 'd' type topics, one or two paragraphs (about 20 lines) of speech produced by one speaker from each group (control & experiment group);

Course-level learning outcomes and objectives/competencies

- Knowledge outcomes: By taking this course, students would know
 - how to analyze intonation phonologically in the Autosegmental-metrical (AM) framework
 - how intonation marks prominence and prosodic structure
 - how the phonological categories of intonation map to surface/phonetic realizations.
 - how intonation interacts with other subareas/topics of linguistics, especially syntactic structure, information structure, prosodic phonology, and phonetics.
 - what the ToBI (Tones and Break Indices) transcription system is.
 - how intonation is language-specific in terms of the tonal categories of intonation as well as their realizations
 - how English intonation is similar to or different from intonation of other languages, especially the intonation system of Japanese, Korean, and French
 - the strengths and weaknesses of the ToBI transcription system

- Skill outcomes: By taking this course, students will be able to
 - transcribe English intonation by using the Mainstream American English ToBI labels and conventions
 - develop an ability to categorize pitch by hearing an utterance
 - develop an ability to distinguish prominent syllables in an utterance
 - develop an ability to perceive different prosodic junctures in an utterance
 - analyze intonational properties of any language or dialect.
- Attitude and values outcomes:
 - Students will learn how seemingly gradual and variable aspect of speech like intonation is also governed by a rule and has an internal structure, affecting how a sound is produced and perceived as well as how we process and interpret sentences and the intention of other speakers
 - Students will learn how all languages have their own unique intonation system while sharing certain common properties
 - Students will learn that all languages are equal and so are all dialects, in that no intonation system of one language or one dialect is better or worse than that of other languages or other dialects in the same language

Tentative Schedule

The topics of each week and relevant background readings are given below. Readings after ‘B’ are core background papers for the topic, thus for everyone, while readings after ‘G’ are additional papers for graduate students. B-readings in pdf are available in two zip files, “**LingC111_211-Basic readings-week1-5**” (~11MB) & “**LingC111_211-Basic Readings-week6-10**” (33MB), and G-readings are in the zip file, “**Ling211-Readings for Graduate students**” (~11MB), under the ‘Week 0’ module of the Bruin Learn course website. Readings within parentheses in each week are further related references. A tentative schedule of when each assignment is handed out is given at the relevant week.

week 1(4/1, 3): Introduction: Intonation and its representation;

Phonological model of English intonation

Lab: be familiar with the software *Praat*

Readings: B – Beckman (1993); Beckman & Pierrehumbert (1986) - about English only

G - Ladd (2008) chs. 1, 2; Pierrehumbert (1980)

(Bolinger (1951); Bruce (1975); Cruttenden (1997); Dainora (2002, 2006))

week 2 (4/8, 10): ToBI system

Lab: presence of accent; simple pitch accents - **Assignment I out**

Readings: B - Beckman & Ayers-Elam (1997) sec. 1.2-1.5; Beckman & Hirschberg (1994);

Beckman, Hirschberg, & Shattuck-Hufnagel (2005)

G - Ladd (2008) ch. 3

(Silverman & Pierrehumbert (1990); Silverman et al. (1992b); Jun (2022))

week 3 (4/15, 17): ToBI system – pitch accents

Lab: Complex pitch accents I - **Assignment II out**

Readings: B - Beckman & Ayers-Elam (1997) sections 2.1-2.2

G - Ladd (2008) ch.5.1; Shattuck-Hufnagel et al. (2004)

(Beckman (1996); Pierrehumbert & Steele (1989))

week 4 (4/22, 24): Intonational tune and its meaning

Lab: Complex pitch accents II - **Assignment III out**

Readings: B - Beckman & Ayers-Elam (1997) sections 2.1-2.2, 2-6-2.8; Pierrehumbert & Hirschberg (1990)

G - Ward & Hirschberg (1985); Ladd (2008) ch.4

(Hirschberg & Ward (1995); Jeong (2018))

week 5 (4/29, 5/1): Durational Correlates of Prosodic Structure and Break Indices

Lab: Break Indices - **Assignment IV out**

Readings: B, G - Beckman & Ayers-Elam (1997) section 3; Wightman et al. (1992); Price et al. (1991)

G - Keating et al. (2004); Kjeelgaard & Speer (1999)

(Ladd & Campbell (1991); Arbisi-Kelm & Jun (2005), Dilley & Shattuck-Hufnagel (1996); Schafer et al. (1996); Snedeker & Trueswell (2003); Nakamura et al. (2019))

week 6 (5/6, 8): Prosodic prominence and boundaries

Lab: Phrase accent and Intonational Phrase boundary tone

Readings: B - Beckman & Ayers-Elam (1997) 2.3-2.5; Ladd (2008) chs. 6 & 8

G – Beckman (1996)

(Cohen et al. (1982); Pierrehumbert & Beckman (1988) pp.233-239; Silverman et al. (1992a), Ross et al (1992), Ipek and Jun (2013))

Midterm Exam: May 8

week 7 (5/13, 15): Pitch Range and Discourse Structure

Lab: labeling the miscellaneous tier - **Assignment V out (on Monday)**

Readings: B - Beckman & Ayers-Elam (1997) sec. 2.9-2.11 & 4; Liberman &

Pierrehumbert (1984)

G - Hirschberg & Pierrehumbert (1986); Brugos et al. 2008

(Terken & Hirschberg (1994); Swerts & Geluykens (1994); Ladd (1994, 2008, ch.5.2, 8.3); Hayes (1994); Calhoun (2007))

week 8 (5/20, 22): Cross-language Comparison of Intonation: Japanese & Korean

Lab: Japanese and Korean ToBI

Readings: B - Beckman & Pierrehumbert (1986) - Japanese part; Venditti (2005);

Jun (2005a); Maekawa et al. (2002)

G - Pierrehumbert & Beckman (1988) ch.2

(P & B (1988) chs. 1 & 3; Kubozono (1989); Maekawa (1994); Venditti &

Swerts (1996); Venditti (1995); Jun (1993, ch. 2; 1998, 2000); de Jong (1994);

Ladd (2008) ch.7.2; Lee & Kim (1998); Lee (1999); Jun & Cha (2015))

week 9 (5/27(holiday), 29): Cross-language Comparison of Intonation: French; Challenges of ToBI

Lab: French data; review & production practice

Readings: B, G - Jun & Fougeron (2002); Jun (2022, section 4.5)

G - Cole & Shattuck-Hufnagel (2016); Hualde & Prieto (2016)

(Delais-Roussarie et al. (2015)-French ToBI; Jun & Fougeron 1995, 2000; Hirst

& Di Cristo (1984); Di Cristo (1999); Ahn et al. (2018); Bishop et al. (2020))

week 10 (6/3, 5): Prosodic Typology & review

Readings: B, G - Jun (2014a)

(Ip & Cutler (2022); Ladd (2001); Hyman (2006); Féry (2018))

*** 10 minute Production Exam on Monday June 10.**

*** Final exam on Wednesday June 12, 3:00-6:00pm**

*** Graduate students: Term Project due on Friday, June 14, 5pm.** Upload your paper (pdf) and speech files (.wav) and Textgrid files, with intonation transcribed, used for the paper to BruinLearn course website. If your target language is not English, please add a “gloss” tier and provide the meaning in English. If your target language has lexical stress, please mark the stressed syllable in the Word tier or add a ‘stress’ tier and specify the stressed syllable. If your target language has lexical tone/pitch accent, please mark the tones in the Word tier.
