

Fall 2023

Linguistics 103 Introduction to General Phonetics

- Class: Monday/Wednesday 2:00-3:50pm in Bunche 3211
- Professor: Sun-Ah Jun (jun@humnet.ucla.edu)
Office: 2101J Campbell Hall (inside the Phonetics Lab)
Office hours: Mon 1:00-1:30pm & Wed 4:00-5:30pm & by appointment
(in person or on Zoom: <https://ucla.zoom.us/j/7138245501>)
- TA: John McGahay (jmcgahay@g.ucla.edu)
Office: 1110 Rolfe
Office hours: Tues 4:00-5:00pm, Thurs 11am-12pm, & by appointment
- Sections: *** You must enroll to a section to take this class ***
Sec A: Thursday at 1pm, Rolfe 3129
Sec B: Thursday at 2pm, Bunche 2173
Sec C: Thursday at 3pm, Public Affairs 2292
Sec D: Thursday at 4pm, Public Affairs 2238
- Prerequisite: Ling. 20 (Introduction to Linguistics)
- Textbook: *A Course in Phonetics (CiP)*, (2015) 7th ed. by Peter Ladefoged & Keith Johnson, Publisher: Cengage Learning (Reserved in Powell Library)

Course Description

This class introduces articulatory and acoustic phonetics, with an emphasis on the production and transcription of sounds of the world's languages. The lectures will concentrate on some of the general principles involved in speech production and how to articulate and transcribe the sounds in the IPA (International Phonetic Alphabet) chart. You will also learn how to write a term paper based on your research and fieldwork. In section meetings, you will have practical experience in producing and transcribing a variety of speech sounds as well as in observing acoustic data.

Course Objectives and Competencies

This course is designed to familiarize you with the basic elements of phonetics so you could take more advanced courses in phonetics and phonology. You will also learn how to use your phonetic knowledge for linguistic fieldwork and language documentation. By the end of the course you should be able to do the following:

- Knowledge outcome:
 - Students will gain knowledge of how human speech sounds are articulated
 - Students will recognize different airstream mechanisms
 - Students will learn what sounds are represented in the IPA (international Phonetic Alphabet) chart

- Students will recognize which sound an IPA symbol stands for and identify its phonetic properties
- Students will learn basic acoustic properties of vowels and consonants
- Students will learn how to conduct research and write a term paper.
- Skill outcomes:
 - Students will be able to identify the speech organs involved in producing various types of speech sounds
 - Students will be able to Identify and build minimal pairs to establish a phonemic status of a sound
 - Students will be able to compare the phonetic categories of different languages
 - Students will be able to produce all the sounds included in the IPA chart
 - Students will be able to transcribe unfamiliar speech sounds in IPA
 - Students will be able to use speech analysis software *Praat*.
 - Students will be able to measure the duration of acoustic events on waveform
 - Students will be able to calculate fundamental frequency (f0) from waveform
 - Students will be able to identify vowels and consonants on waveforms and spectrograms, e.g.,
 - vowels differ in vowel height and backness
 - different manners of consonant articulation (e.g., stops, fricatives, approximants)
 - boundaries between consonants and vowels
 - Students will be able to use acoustic analysis software to improve a transcription
 - Students will be able to describe the sound inventory of a language
- Attitude and values outcome:
 - Students will appreciate how important the knowledge of phonetics is in doing linguistic fieldwork and language documentation
 - Students will appreciate native speaker consultants' time and contribution
 - Students will appreciate fieldwork researchers' time and effort in uncovering the sound system of many (un)known languages in the world
 - Students will learn how different languages/dialects have different sounds and no language/dialect is superior to other languages/dialects

Course Requirements and Grading

• three homework	18%
• quiz 1 (IPA chart) – in class	5%
• quiz 2 (spectrogram reading) – in class	10%
• a midterm exam – in class	20%
• two transcription exams	10%
• an individual production exam	10%
• a term project, a preliminary report	4%
• a term project, a wordlist	4%
• a term project, a final form	19%
• experiment participation (optional)	extra 1% (see below for more info)

Rules and Regulations

1. All term-project related writings are to be done by you AS AN INDIVIDUAL. Collaboration is NOT ALLOWED on written work. On the other hand, you are encouraged to practice your listening/transcription and production skills together.
2. Due dates can change. You are responsible for knowing what is due when.
3. Homework will be given online through Bruin Learn, but parts of homework 1 and 3 will be offline. When online, homework answers will be released right after the deadline. In that case, no late homework will be accepted.
4. Term-project related write-ups and the offline part of homework will be given 50% credit if submitted up to 24 hours after the deadline, 25% credit if later than 24 hours but not later than 48 hours. But no credit will be given if later than 48 hours after the deadline.
5. Grades will be changed for clerical errors only and may get curved. But a curved grade won't be lower than the grade not on a curve. e.g., if your final score is 90, your grade can be higher than A- but won't be lower than A-.
6. The grade for the Production exam can be adjusted higher based on your effort and attendance in the section meetings.
7. No makeup exam/quiz will be given except in dire, documented medical or family emergencies. If it's possible, call me or email me *before* the test!
8. Suspected cheater or plagiarist will be sent to the Dean of Students with a full report.

Academic integrity: Students are expected to **strictly** follow standards of academic integrity. As specified in the UCLA Student Conduct Code, violations or attempted violations of academic dishonesty include, but are not limited to, cheating, fabrication, plagiarism, multiple submissions or facilitating academic dishonesty. **Plagiarism on a report/paper or cheating during the exam will be reported to the UCLA Office of the Dean of Students.** See <https://deanofstudents.ucla.edu/student-conduct> for further information.

Experiment Participation (Optional, but earn 1% of the final grade as extra credit)

You have the opportunity to earn **extra credit** by participating in one experiment **through the Psychology Department Subject Pool, i.e., the SONA system**. Serving as a subject in an experiment provides students with direct exposure to psychological and linguistic research. By participating in experiments, you will have the opportunity to contribute to on-going research at UCLA while getting an inside glimpse of how research studies are conducted.

If you participate in one or two experiments that are longer than 30 minutes, you will have **1 point (i.e., 1%) added to your final grade** at the end of the quarter.

The posting and scheduling of experiments is handled via the Psychology Department Subject Pool system at <http://ucla.sona-systems.com/>. More information on how to use the system can be found at <http://www.psych.ucla.edu/undergraduate/subject-pool-experiment-participation>.

NOTE: Before signing up for experiments, you **MUST** select the course for which you want your experiment credits to count. **All experiments for Fall 2023 must be completed by Dec. 7, 2023 (Thursday of 10th Week).**

A term project: Submit your sound file and written paper by **Dec. 10, Sunday midnight.**

A term project is a “field study” project, in which you obtain a description of the phoneme inventory and major allophones of a language by transcribing forms elicited from a native speaker of a language that you choose and work on independently. This is the major assignment for this course (worth 30% of the final grade).

Goal of the project: to give you an opportunity to practice your skills of perceiving and transcribing the speech sounds of a language you are *not* familiar with. You will also get experience working with phonemes and allophones and doing library research. It is also an opportunity to learn about a language that interests you.

Basic Procedures and Schedule: 1. Select a language and find a speaker to work with (WEEK 1 and 2), 2. Do library research on the sounds of that language (WEEK 2), 3. Turn in a preliminary report where you describe your language and speaker and references you found (WEEK 3), 4. Develop a list of words that illustrate the sounds of your language (i.e. phonemes and allophones) by consulting your speaker and references (submit your word list by Friday of WEEK 5), 5. Make a recording of your speaker reading those word list (WEEKS 7-8), 6. Transcribe your recording, summarize the sound system, and *describe* the *phonetic* characteristics of the sounds (WEEK 8-10), and 7. Submit your recording (.wav file) and paper (by Friday of WEEK 10). (A more detailed handout will be given later.)

Language: Any language/dialect is fine, but you should choose a language that you are *not* familiar with but sounds interesting to you and for which you can find a speaker. Extra consideration will be given for projects on more difficult languages (e.g. languages with many consonants or vowels, with tone and pitch accents; languages with little prior documentation). If you work on a language which has a fairly simple sound system, such as Spanish, or Tagalog, or a language of which you are familiar with, then you will have to provide a more detailed description to get a high grade.

Speaker: The speaker should be someone who is willing to help you (that is, will meet with you for several hours over the quarter), will still be around in week 8 of the quarter when you record, *has not already been a speaker for a Ling 103 term project*, and is a *fluent native speaker* of a language other than English. The speaker can speak any dialect of the language.

Find your speaker from your friends, relatives, fellow students, neighbors, fellow employees, etc., who are older than 17. *Two students in this class may not work with the same speaker, but may work with each other.* It is easier if both you and your consultant can read the orthography of the language, but not necessary. Graduate students interested in TESL may work on the English of a non-native speaker, incorporating a contrastive analysis between his/her native language and English.

Recording: Record to a computer at the Phonetics Lab. However, if scheduling your speaker (to come to the Phonetics Lab) is not easy, you could record your speaker at a more convenient location using your own recording equipment as long as the quality of the recording is good (you can check the quality with me). If you plan to record at the Phonetics Lab, you need to schedule online in advance to use the facility. An instruction on how to schedule your recording and how to record in the phonetic lab will be given at a section meeting.

Listening Exercise and Speech analysis program

In addition to coming to every section meetings, you can practice production and transcription of IPA sounds from UCLA Phonetics Lab Data (<http://www.phonetics.ucla.edu/>).

This website also contains the exercises in the textbook, *A Course in Phonetics* (5th edition), and another book by Peter Ladefoged, *Vowels and Consonants* (www.phonetics.ucla.edu/vowels/contents.html).

For homework 3, you would need to use a speech analysis program, *Praat*. Further information about using the software will be given at a section meeting.

Helpful Books and References (on Reserve in Powell Library) for term projects, not specific to any language; See next pages for a list of books on reserve for individual languages.

Handbook of the International Phonetic Association (1999)

— a guide to the use of the International Phonetic Alphabet

Maddieson, I. (1984) *Patterns of Sounds*

— Bibliography and partial phoneme charts from about 240 languages.

Pullum, G. & W. Ladusaw (1986) *Phonetic Symbol Guide*

— useful for interpreting sources written outside the IPA tradition

Comrie, B. (2009) *The World's Major Languages*, Oxford Univ. Press

Ladefoged, P. & I. Maddieson. (1996) *The Sounds of the World's Languages*. Blackwells.

Ling. 103, Fall 2023

Jun/McGahay

Tentative Class Schedule

Week/Dates	Topics and assignment	Readings	Section
1. Oct. 2, 4	Introduction; Articulatory Phonetics, The sounds of English	ch.1 chs.3, 4	vocal organs IPA chart
2. Oct. 9, 11	Phonemic and Phonetic Transcription Allophones of English	ch.2, 3	transcription of English words
3. Oct. 16, 18	Airstream mechanisms and phonation Larynx tape Homework 1 <u>Preliminary report due</u> on Friday (10/20)	ch.6	ejectives, clicks, implosives
4. Oct. 23, 25	Consonants: Place and Manner of articulation Homework 2 Quiz 1 (10/25, in class)	ch.7	place & manner of articulation of non-English Cons
5. Oct. 30, Nov.1	Vowels and Approximants; Language demo; review <u>Word list due</u> on Friday (11/3)	ch.9	non-English vowels & approximants
6. Nov. 6, 8	suprasegmentals Midterm & transcription exam (11/8)	chs.5, 10	how to record at Phonetics lab ; how to use <i>Praat</i>
7. Nov. 13, 15	suprasegmentals [Project-recording]	chs.5, 10	suprasegmentals; transcription exercise
8. Nov. 20, 22	Introduction to Acoustics Acoustics of Vowels [Finish recording]	ch.8	(Thanksgiving holiday)
9. Nov. 27, 29	Acoustics of Vowels & Consonants Homework 3 Final transcription exam (11/29)	ch.8	acoustics; Production exam prep
10. Dec. 4, 6	More on acoustics Quiz 2 (12/6, in class)	ch.8	production exam preparation

Term Project due on Sunday, Dec. 10, midnight**Individual Production Exam:** Dec. 11 & 12 (10 minutes, to be scheduled)

*****Not specific to Ling103 but useful info for students' well-being*****

Students needing accommodations based on disability:

Students needing academic accommodations based on a disability should contact the Center for Accessible Education (CAE) at (310)825-1501 or in person at Murphy Hall A242.

*Any students seeking disability services please register with the CAE as soon as possible. If you are already registered and require assistance for the quarter, please release your accommodation letters **by the end of week one**.*

For more information visit www.cae.ucla.edu.

Discrimination:

Title IX Resources

UCLA prohibits gender discrimination, including sexual harassment, domestic and dating violence, sexual assault, and stalking. If you have experienced sexual harassment or sexual violence, there are a variety of resources to assist you.

CONFIDENTIAL RESOURCES:

You can receive confidential support and advocacy at the CARE Advocacy Office for Sexual and Gender-Based Violence, 1st Floor Wooden Center West, CAREadvocate@careprogram.ucla.edu, (310) 206-2465. Counseling and Psychological Services (CAPS) also provides confidential counseling to all students and can be reached 24/7 at (310) 825-0768.

NON-CONFIDENTIAL RESOURCES:

You can also report sexual violence or sexual harassment directly to the University's Title IX Coordinator, 2241 Murphy Hall, titleix@conet.ucla.edu, (310) 206-3417. Reports to law enforcement can be made to UCPD at (310) 825-1491. These offices may be required to pursue an official investigation.

Note: Faculty and TAs are required under the [UC Policy on Sexual Violence and Sexual Harassment](#) to inform the Title IX Coordinator —A NON-CONFIDENTIAL RESOURCE—should they become aware that you or any other student has experienced sexual violence or sexual harassment.

Psychological Health, Well-Being and Resilience

UCLA is renowned for academic excellence, and yet many students feel overwhelmed at times by demands to succeed academically, socially and personally. Our campus community is committed to helping all students thrive, learn to cope with stress, and build resilience. Remember, self-care is a skill that is critical to your long-term success. Here are some of the many resources available at UCLA to support you:

- **Counseling and Psychological Services (CAPS):** <https://www.counseling.ucla.edu/> Provides counseling and other psychological/mental health services to students. Walk-in hours are Monday-Thursday 8am-4:30pm and Friday 9am-4:30pm in John Wooden Center West. Crisis counseling is also available 24 hours/day at (310) 825-0768.
- **Ashe Student Health and Wellness Center:** <http://www.studenthealth.ucla.edu> Provides high quality and accessible ambulatory healthcare and education by caring professionals to support the academic success and personal development of all UCLA students.
- **Healthy Campus Initiative (HCI):** <https://healthy.ucla.edu> Provides links to a wide variety of resources for enhancing physical and psychological well-being, positive social interactions, healthy sleep, healthy eating, healthy physical activity and more.
- **Campus and Student Resilience:** <https://www.resilience.ucla.edu/> Provides programs to promote resilience and trains students to help support their peers.
- **UCLA Recreation:** <https://www.recreation.ucla.edu/> Offers a broad array of services and programs including fitness, yoga, dance, martial arts, meditation, sports, and much more.
- **Equity, Diversity and Inclusion:** <https://equity.ucla.edu/> Committed to providing an equal learning, working and living environment at UCLA and supports a range of programs to promote these goals campus-wide.
- **UCLA GRIT Coaching Program:** <https://www.grit.ucla.edu/> GRIT stands for Guidance, Resilience, Integrity and Transformation. In this program, UCLA students receive individualized support from trained peer coaches to manage stress, fostering positive social connections, set goals, and navigate campus resources.
